

PRIOR TO RESTATEMENT

**Q1
2007**

**SUPPLEMENTARY
PACKAGE**

FOR THE QUARTER ENDED
JANUARY 31 • 2007

BMO has restated its interim financial statements and MD&A for the first quarter of 2007 to reflect the effects of previously announced commodities trading losses that relate to that quarter.

Please refer to the restated First Quarter 2007 Report to Shareholders.

NOTES TO USERS**Restatement of Prior Periods****Changes**

Periodically, certain business lines or units within business lines are transferred between client groups to more closely align BMO's organizational structure and its strategic priorities. All comparative figures are reclassified to reflect these transfers.

Restructuring Charge

On January 31, 2007, we recorded a restructuring charge of \$135 million in the Consolidated Statement of Income. The objectives of the restructuring are to enhance customer service by directing spending and resources on front-line sales and service improvements; creating more efficient processes and systems across the company and continuing accelerating the pace of the company's growth.

Refer to Note 7 of the Consolidated Financial Statements.

To assist in the analysis of our financial performance, we have included the financial results of the Bank and our Corporate Services segment excluding the impact of the restructuring charge on pages 6, 8 and 15. Since total restructuring charge was recorded in our Corporate Services segment, only the financial results Total Bank and Corporate Services are impacted.

Use of this Document

Information in this document is supplementary to the Bank's first quarter Press Release, MD&A, Financial Statements, and the 2006 Annual Report and should be read in conjunction with those documents.

Additional financial information is also available throughout the slide presentations for the Strategic Update, Financial Review and Risk Review, as well as the Conference Call Webcast. These can be accessed at our website at www.bmo.com/investorrelations.

This report is unaudited and all amounts are in millions of Canadian dollars, unless indicated otherwise.

Items indicated N.A. were not available.

Items indicated n.a. were not applicable.

Refer to the "GAAP and Related Non-GAAP Measures used in the MEDIA" section of the "Financial Performance Review" included in the Management's Discussion and Analysis for an explanation of cash results, reporting on a taxable equivalent basis (tbe) and net economic profit. Securities regulators require that companies caution readers that earnings and other measures adjusted to a basis other than generally accepted accounting principles (GAAP) do not have standardized meanings under GAAP and are unlikely to be comparable to similar measures used by other companies.

Changes in Accounting Policy

During Fiscal 2007, we adopted new accounting requirements of the Canadian Institute of Chartered Accountants. Refer to Note 2 of the Consolidated Financial Statements.

On November 1, 2006, we adopted the Canadian Institute of Chartered Accountants' accounting requirements for securities, hedging derivatives, other comprehensive income and certain other financial instruments. Prior periods have not been restated.

Other Comprehensive Income

The new rules require that we present a new Consolidated Statement of Comprehensive Income, which is comprised of net income, changes in unrealized gains or losses related to available-for-sale securities, changes in unrealized gains or losses related to cash flow hedges and the net unrealized foreign exchange gain or loss for the period related to our net investment in foreign operations. This statement has been included above our Consolidated Statement of Changes in Shareholders' Equity.

(a) Securities

The new rules require that we reclassify certain of our securities previously classified as investment securities as either available-for-sale or held-to-maturity securities.

Available-for-sale securities are measured at fair value with unrealized gains and losses recorded in other comprehensive income until the security is either sold, or if an unrealized loss is considered other than temporary, the unrealized loss is recorded in income. The criteria for other than temporary impairment remain unchanged. Available-for-sale securities where there is no quoted market price, including securities whose sale is restricted, will continue to be recorded at amortized cost. We have not classified any of our investment securities as held-to-maturity.

The new rules do not impact accounting for our merchant banking investments or investments in corporate equity where we exert significant influence, but not control. These are recorded as other securities on our Consolidated Balance Sheet. Additional information on our policies related to securities, determining fair value and other than temporary impairment is included in Note 3 to our consolidated financial statements for the year ended October 31, 2006.

On November 1, 2006, we remeasured our available-for-sale securities at fair value, as appropriate. A net unrealized gain of \$3 million was recorded in opening accumulated other comprehensive income.

(b) Hedging Derivatives

The new rules require us to record all of our hedging derivatives at fair value. Prior to November 1, 2006, we accounted for derivatives that qualified as accounting hedges on an accrual basis.

The types of hedging relationships that qualify for hedge accounting have not changed under the new rules. We will continue to designate our hedges as either cash flow hedges or fair value hedges. A description of the items or transactions that we hedge and the risk management policy for each type of hedge is included in Note 9 to our consolidated financial statements for the year ended October 31, 2006.

(i) Cash Flow Hedges

Cash flow hedges are used to manage the possible increase or decrease in interest income or expense related to variable rate assets and liabilities due to changes in interest rates.

Under the new rules, we will continue to record interest receivable or payable on the derivative as an adjustment to interest, dividend and fee income in the Consolidated Statement of Income over the life of the hedge.

To the extent that changes in the fair value of the derivative offset changes in the fair value of the hedged item, they are recorded in other comprehensive income. Any portion of the change in fair value of the derivative that does not offset changes in the fair value of the hedged item (the ineffectiveness of the hedge) is recorded directly in non-interest revenue, other in the Consolidated Statement of Income. The ineffective portion of our cash flow hedges totaled \$1 million for the quarter ended January 31, 2007.

For hedges that are discontinued before the end of the original hedge term, the unrealized gain or loss in other comprehensive income is amortized to interest, dividend and fee income in the Consolidated Statement of Income over the remaining term of the original hedge. If the hedged item is sold or settled, the entire unrealized gain or loss is recognized in interest, dividend and fee income in the Consolidated Statement of Income. The amount of other comprehensive loss that is expected to be reclassified to the Consolidated Statement of Income over the next 12 months is \$15 million (\$10 million after tax). This will be offset by increased net interest income on assets and liabilities that are hedged.

On November 1, 2006, we remeasured our cash flow hedge derivatives at fair value. The portion of the fair value that offset the fair value of the hedged item totaled \$8 million (\$5 million after tax) and was recorded in opening accumulated other comprehensive income. The ineffective portion of cash flow hedges recorded in opening retained earnings totaled less than \$1 million. We also reclassified \$86 million (\$56 million after tax) of deferred losses related to cash flow hedges that were discontinued prior to November 1, 2006 from other assets to opening accumulated other comprehensive income.

(ii) Fair Value Hedges

Fair value hedges are used to manage possible changes in the value of our fixed rate assets and liabilities due to changes in interest rates. For fair value hedges, not only is the hedging derivative recorded at fair value but fixed rate assets and liabilities that are part of a hedging relationship are adjusted for the changes in value of the risk being hedged (quasi fair value). To the extent that the change in the fair value of the derivative does not offset changes in the quasi fair value adjustment to the hedged item (the ineffectiveness of the hedge), the net amount will be recorded directly in non-interest revenue, other in the Consolidated Statement of Income. The ineffective portion of our fair value hedges totaled less than \$1 million for the quarter ended January 31, 2007.

For fair value hedges that are discontinued, we cease adjusting the hedged item to quasi fair value. The quasi fair value adjustment on the hedged item will be recorded as an adjustment to the interest income/expense on the hedged item over its remaining term to maturity. If the hedged item is sold or settled, any remaining quasi fair value adjustment would be included in the determination of the gain or loss on sale or settlement.

When we remeasured fair value hedging derivatives to fair value on November 1, 2006, we made a corresponding adjustment to the carrying value of the items that we hedge with those derivatives (quasi fair value adjustment). The difference between these two amounts was recorded in opening retained earnings and totaled less than \$1 million. On November 1, 2006, we also reclassified deferred amounts related to fair value hedges that were discontinued prior to November 1, 2006 from other assets to adjust the carrying amount of the items that were previously hedged. Quasi fair value adjustments related to these two activities were comprised of an increase in loans of \$3 million, an increase in deposits of \$38 million, an increase in subordinated debt of \$9 million and an increase in other assets of \$6 million.

(c) Fair Value Option

The new rules allow management to elect to measure financial instruments that would not otherwise be accounted for at fair value as trading instruments with changes in fair value recorded in income provided they meet certain criteria. Financial instruments must be designated on November 1, 2006 when the new standard was adopted or when new financial instruments are acquired, and the designation is irrevocable.

Structured notes issued by the Bank include embedded options. The Bank enters into derivatives which manage our exposure to changes in the structured note fair value caused by changes in interest rates. The structured notes are designated as trading under the fair value option which better aligns the accounting result with how the portfolio is managed. These notes are classified as other liabilities. The fair value and amount due at contractual maturity of these notes as at January 31, 2007 was \$532 million and \$526 million, respectively. The impact of recording these notes as trading was an increase in non-interest revenue, trading revenues of \$3 million for the quarter ended January 31, 2007. The increase was offset by a loss on the derivatives.

Securities in our insurance subsidiaries that support our insurance liabilities have been designated as trading under the fair value option. Since the actuarial calculation of insurance liabilities is based on the recorded value of the securities supporting them, recording the securities at fair value better aligns the accounting result with how the portfolio is managed. The fair value of these securities as at January 31, 2007 was \$33 million. The impact of recording these securities as trading was an increase in non-interest revenue, insurance income of less than \$1 million for the quarter ended January 31, 2007.

On November 1, 2006, we remeasured the portfolio of structured notes and certain of our insurance subsidiary securities at fair value. The net unrealized loss of less than \$1 million was recorded in opening retained earnings.

(d) Effective Interest Method

Loan origination costs are included in our loan balances and are recognized in interest, dividend and fee income, loans, over the life of the resulting loan. Prior to November 1, 2006, an equal amount of loan origination costs were recognized each period over the life of the resulting loan. The new rules require that we use the effective interest method to recognize loan origination costs whereby the amount recognized varies over the life of the loan based on principal outstanding.

For information on future accounting changes, please see the section of our first quarter Press Release entitled "Future Accounting Changes."

Users may provide their comments and suggestions on the Supplementary Financial Information document by contacting Krista White at (416) 867-7019 or krista.white@bmo.com.

Net Income by Operating Group
Basis of Presentation

The results of these operating groups are based on our internal financial reporting systems. The accounting policies used in these groups are generally consistent with those followed in the preparation of the consolidated financial statements as disclosed in Notes 1 and 2 to the unaudited interim consolidated financial statements for the quarter ended January 31, 2007.

Notable accounting measurement differences are the taxable equivalent basis adjustment and the provision for credit losses, as described below.

Taxable Equivalent Basis

We analyze net interest income on a taxable equivalent basis ("teb"). This basis includes an adjustment which increases GAAP revenues and the GAAP provision for income taxes by an amount that would raise revenues on certain tax-exempt securities to a level that would incur tax at the statutory rate.

Provisions for Credit Losses

Provisions for credit losses are generally allocated to each group based on expected losses for that group over an economic cycle. Differences between expected loss provisions and provisions required under GAAP are included in Corporate Services.

Inter-Group Allocations

Various estimates and allocation methodologies are used in the preparation of the operating groups' financial information. We allocate expenses directly related to earning revenue to the groups that earned the related revenue.

Expenses not directly related to earning revenue, such as overhead expenses, are allocated to operating groups using allocation formulas applied on a consistent basis. Operating group net interest income reflects internal funding charges and credits on the groups' assets, liabilities and capital, at market rates, taking into account relevant terms and currency considerations. The offset of the net impact of these charges and credits is reflected in Corporate Services.

Geographic Information

We operate primarily in Canada and the United States but also have operations in the United Kingdom, Europe, the Caribbean and Asia, which are grouped in Other countries. We allocate our results by geographic region based on the location of the unit responsible for managing the related assets, liabilities, revenues and expenses, except for the consolidated provision for credit losses, which is allocated based upon the country of ultimate risk.

Prior periods have been restated to give effect to the current period's organization structure and presentation changes.

Trading revenues include interest earned on trading securities and other cash instruments held in trading portfolios, less internal and external funding costs associated with trading-related derivatives and cash instruments, and realized and unrealized gains and losses on trading securities, other cash instruments, derivatives and foreign exchange activities.

Interest rates includes Canadian government securities, corporate debt instruments and interest rate derivatives.

Foreign exchange includes foreign exchange spot and foreign exchange derivatives contracts from our wholesale banking business.

Equities includes institutional equities, equity derivatives and proprietary trading.

Other includes commodities, managed futures, credit investment management, Harris trading and global distribution loan trading and sales.

(1) Intangible assets in excess of 5% of gross tier 1 capital are deducted from tier 1 capital as required by OSFI guidelines.

(2) Reflects the qualification of existing preferred shares of a subsidiary as tier 2 capital.

(3) OSFI permits the inclusion of the lesser of the balance of the general allowance for credit losses and 0.875% of risk-weighted assets.

(2) On November 1, 2006, we adopted new accounting requirements for securities, which require our available-for-sale securities to be recorded at fair value.

Prior periods were not restated. Please see Note 2 to the unaudited interim consolidated financial statements for the quarter ended January 31, 2007.

(3) Corporate debt and corporate equity include merchant banking investments, which have been recorded at fair value since November 1, 2004, when we adopted new accounting rules applicable to our merchant banking subsidiaries.

(1) On November 1, 2006, we adopted the new accounting requirements for securities, hedging derivatives, and certain other financial instruments (see Note 2 to the unaudited interim consolidated financial statements for the quarter ended January 31, 2007). The accounting treatment prescribed under this new Canadian accounting standard is currently applied under United States GAAP.

(2) On November 1, 2005, we prospectively adopted the new accounting standard on Stock-Based Compensation (see Note 9 to the unaudited interim consolidated financial statements for the quarter ended October 31, 2006).

Under United States GAAP, Stock-Based Compensation granted to employees eligible to retire should be expensed at the time of grant. During the quarter ended July 31, 2006, we retroactively adopted new Canadian accounting guidance on Stock-Based Compensation, which is harmonized with United States GAAP. Due to the differences in method of adoption, there will continue to be an adjustment to the Consolidated Statement of Income until the Stock Based Compensation granted prior to November 1, 2005 has been fully amortized.

(3) On November 1, 2004, we adopted fair value accounting for our merchant banking investments for Canadian GAAP purposes (see Note 2 to the unaudited interim consolidated financial statements for the quarter ended October 31, 2005).

Under United States GAAP, we have not adopted fair value accounting for these investments.

Gap Position Major Assumptions - Assets

- Fixed rate, fixed term assets, such as mortgage and consumer loans, are reported based upon the scheduled repayments and estimated prepayments that reflect expected borrower behaviour.
- Trading and Underwriting (mark-to-market) assets and interest bearing assets on which the customer interest rate changes with the prime rate or other short-term market rates are reported in the 0 to 3 months category.
- Fixed rate and non-interest bearing assets with no defined maturity are reported based upon an imputed maturity profile.

Gap Position Major Assumptions - Deposits/ Liabilities

- Fixed rate, fixed term liabilities, such as investment certificates, are reported at scheduled maturity with estimated redemptions that reflect expected depositor behaviour.
- Interest bearing deposits on which the customer interest rate changes with the prime rate or other short-term market rates are reported in the 0 to 3 months category.
- Fixed rate and non-interest bearing liabilities with no defined maturity are reported based upon an imputed maturity profile.

Capital

- Common shareholders' equity is reported as non-interest sensitive.

Earnings Sensitivity/Economic Value Sensitivity - Interest Rate Risk

"Earnings Sensitivity" is the impact of change in interest rates on twelve month net income, while, "Economic Value Sensitivity" is the impact of a change in interest rates on the value of our assets and liabilities.

"100/200 Basis Point Increase/Decrease" is the impact on earnings and economic value of a one time increase/decrease of 100/200 basis points in interest rates, applied to our position at the period end.

In all cases, interest rates did not fall below 0%. Calculations do not reflect the effect of actions which the Bank may take to reduce risk.

Losses are in brackets and benefits are presented as positive amounts.

Structural portfolios are CAD/U.S. consumer, commercial and corporate instruments and securitization structures. For these portfolios, risk measures reflect asset/liability interest rate mismatches, embedded options, including the expected impact of customer behaviour, and the impact of minimum rates on deposits.

Money market/accrual exposures are bank placements and acceptances, repos and reverse repos, international loans and certain investment securities for major currencies. While categorized as trading and underwriting, these portfolios are accounted for using accrual accounting rules under GAAP.

Mark to market portfolios are all trading and underwriting portfolios where accounting rules mandate mark to market treatment.

Earnings Volatility and Market Value Exposure

"Earnings Volatility and Market Value Exposure" are the impact on twelve month earnings and economic value, respectively, of a one time change in market rates/prices applied to our positions at the period end. Calculations are based upon a statistical analysis of history using a 99% confidence level, over an appropriate holding period, and do not reflect the effect of actions which the bank may take to reduce risk.

Losses are in brackets and benefits are presented as positive amounts.

In the third quarter of 2006, enhancements were made to the measurement of credit spread risk.

Money market / accrual portfolios comprise bank placements and acceptances, repos and reverse repos, international loans and certain investment securities.

While categorized as trading and underwriting, these portfolios are accounted for using accrual accounting rules under GAAP.

Interest rate risk is the primary driver of market risk in the money market / accrual portfolios.

Mark to market portfolios are all trading and underwriting portfolios where accounting rules mandate mark to market treatment.

Structural portfolios are CAD/U.S. consumer, commercial and corporate instruments and securitization structures. For these portfolios, risk measures reflect asset/liability interest rate mismatches, embedded options, including the expected impact of customer behaviour, the impact of minimum rates on deposits and foreign exchange transaction risk affecting net income.

The Total Bank earnings volatility and market value exposure measures are conservative as they do not include the benefit of correlation between the mark to market, money market / accrual, and structural portfolios.
